github.com/aalbrecht17235 | www.ohheyitsandrew.com | www.linkedin.com/in/andrew-albrecht

Technical Skills:

Javascript, CSS3, HTML5, jQuery, React, MySQL, Express, Node, Git, MongoDB

Relevant Projects:

Minimalist | https://minimalist.netlify.com/ **2019**
Back End Focused Developer
A minimal journaling app that guides users through daily, weekly, and monthly self-reflections.
Intentionally minimal. Incredibly powerful.
- Developed a full and secure user authentication flow for the application
- Used MVC architectural pattern
- Created models and controllers, worked on CRUD aspects with MongoDB
- Worked with front end partners to create a functional full stack application

ProTrip | www.protrip.info **2018**
Javascript Developer
A road trip planning app that allows the user to plan their next stop by providing info on gas, food, and events.
- Led standups, outlined clear feature goals and deadlines, delegated responsibilities
- Developed the search function and API calls to retrieve and submit relevant information to the user

Experience:

Texas Floodplain Management Association, TACERA **2017 - Current**
Website Maintenance & Administrative Assistant
Maintain association websites which are hosted through Wild Apricot and Your Membership.
- Website maintenance and troubleshooting
- Used Wild Apricot CMS to construct and maintain www.tacera1.com
